COLD PLASMA

## MISSION: ENVIRONMENTAL INDUSTRY

The private economic sphere assumes the role of protecting the ecosphere by producing in the first stage, equipment enabling the restoration of natural qualities of the atmosphere, or reduces pollution at source.

Is the area through which the destructive action of man is offset by technological support in order to maintain thermodynamic equilibrium of the Planet.

Allow efficient human action by eliminating the environmental costs required and obtaining of raw materials by recovery.

### DIRECTIONS:

1. Further research of planetary mechanism continuing terrestrial life to achieve harmony between HUMAN and PLANET;
2. The production of technological equipment for:  
*LIVING AND THE ATMOSPHERE REMEDIATION;  
WASTE WATER REMEDIATION;  
GETTING WATER FOR ORGANIC AGRICULTURE;  
SOIL REMEDIATION.*
3. Specialized services for polluters;
4. Stimulation of civil society to acquire the skills of respect for nature;
5. Training of specialists in environmental engineering and Nature Guards ;
6. Creating medical conditions for ecological accident victims;
7. Monitoring the causes and effects of natural disasters.

**WE RETURN THE PURITY TO THE NATURE**

**SINCE 2004 WE PRODUCED 1 MILLION KM<sup>3</sup> MOUNTAIN AIR**
